

## Substances Intended to be Registered as of 28-Oct-2010:

**4 735**

**Note :** Phase-in substances registered as of 28-Oct-2010:

**2 222**

The list is sorted by EC number and the 'LR Status' column indicates what Lead Registrant information is in the possession of ECHA. The 'Registered As' columns indicate the type of REACH registrations received by ECHA for each substance, as follows:

**Full** Indicates registration under REACH Article 10 as a full dossier

**OSII** Indicates registration under REACH Article 17 as an on-site isolated intermediate (OSII)

**TII** Indicates registration under REACH Article 18 as a transported isolated intermediate (TII)

**'Yes'** Indicates the substance registration under REACH is complete

**'In Process'** Indicates a dossier on the substance has been successfully submitted to ECHA and is being processed, i.e. the completeness check is pending (and could potentially be unsuccessful)

**Disclaimer:** Substances registered before 2010 may not all yet been included in this list. The next version(s) of the table will take into account the necessary update.
